Energy Star qualified air conditioners and heat pumps may be installed. \*All split system central air conditioners and heat pumps that are installed or retrofit need to have an Electronically Commutated Motor (ECM) or an equivalent as the air handler motor. If a permanent-split capacitor motor (PSC) is present it must be replaced with an ECM or equivalent. The ECM must be included as part of the cost of the central air conditioner and/or heat pump. \*On all split system central air conditioners and heat pump replacements or installations, the A-coil and line set must be sized to match the compressor unit to reach the desired efficiency.
